Description

Summary:

Chart view information is overlayed from multiple sources when specific information is selected for preview and the chart is switched back to the other tab.

Steps to reproduce:

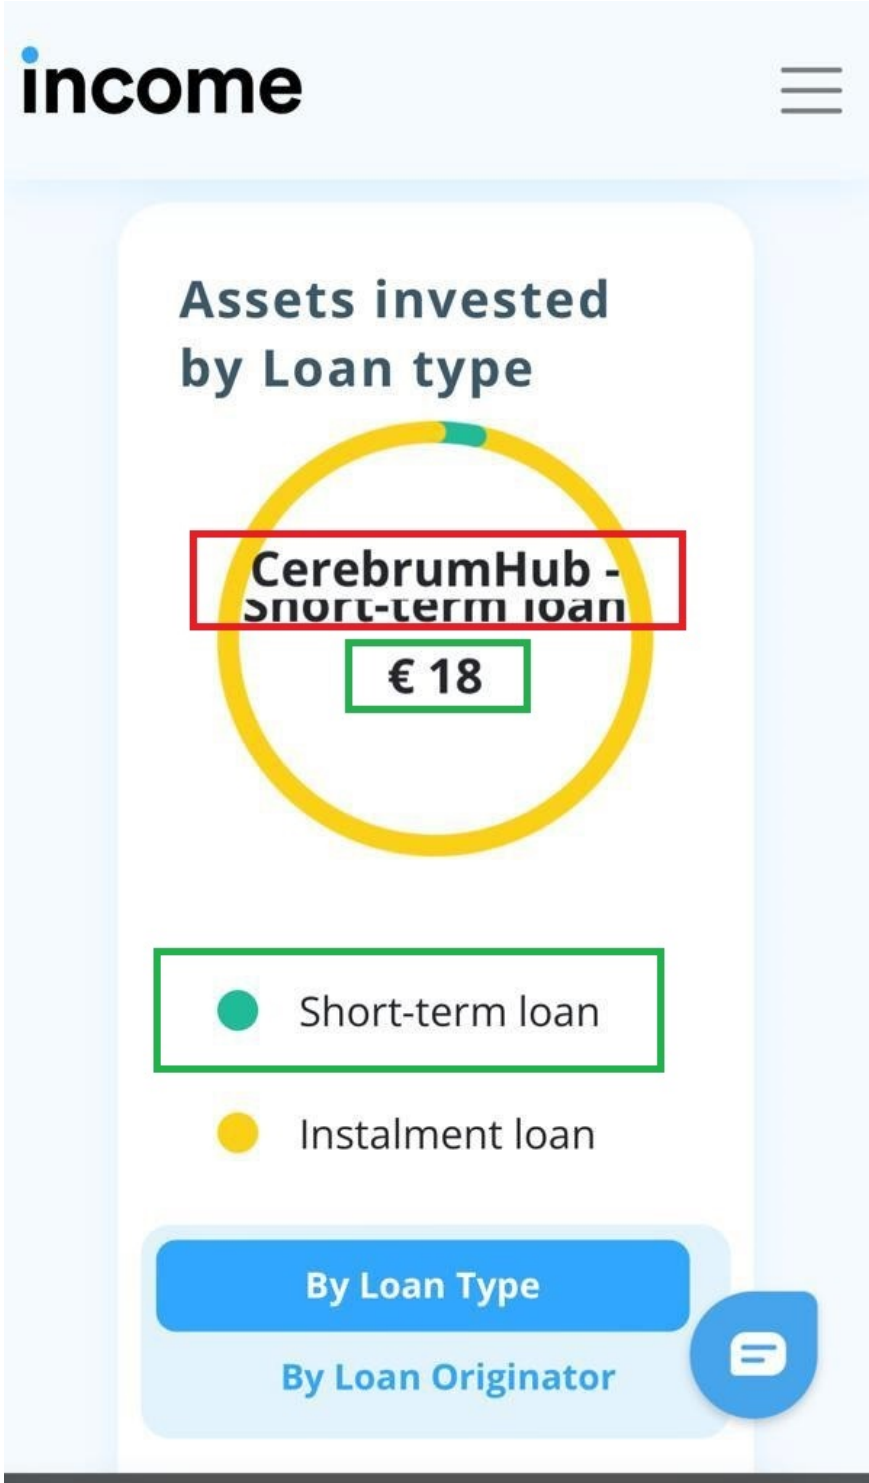

1. Go to <https://income-frontend.code-lab.it/invest>
2. Log in
3. Navigate to the Account page
4. <By Loan Type>
5. <By Loan Originator>
6. Select to show a different originator than presented
7. <By Loan Type>
8. Select to show a different type than presented
9. <By Country>
10. <By Loan Durattion>
11. Select to show a different duration than presented
12. <By Country>
13. Select to show a different country than presented

Expected result:

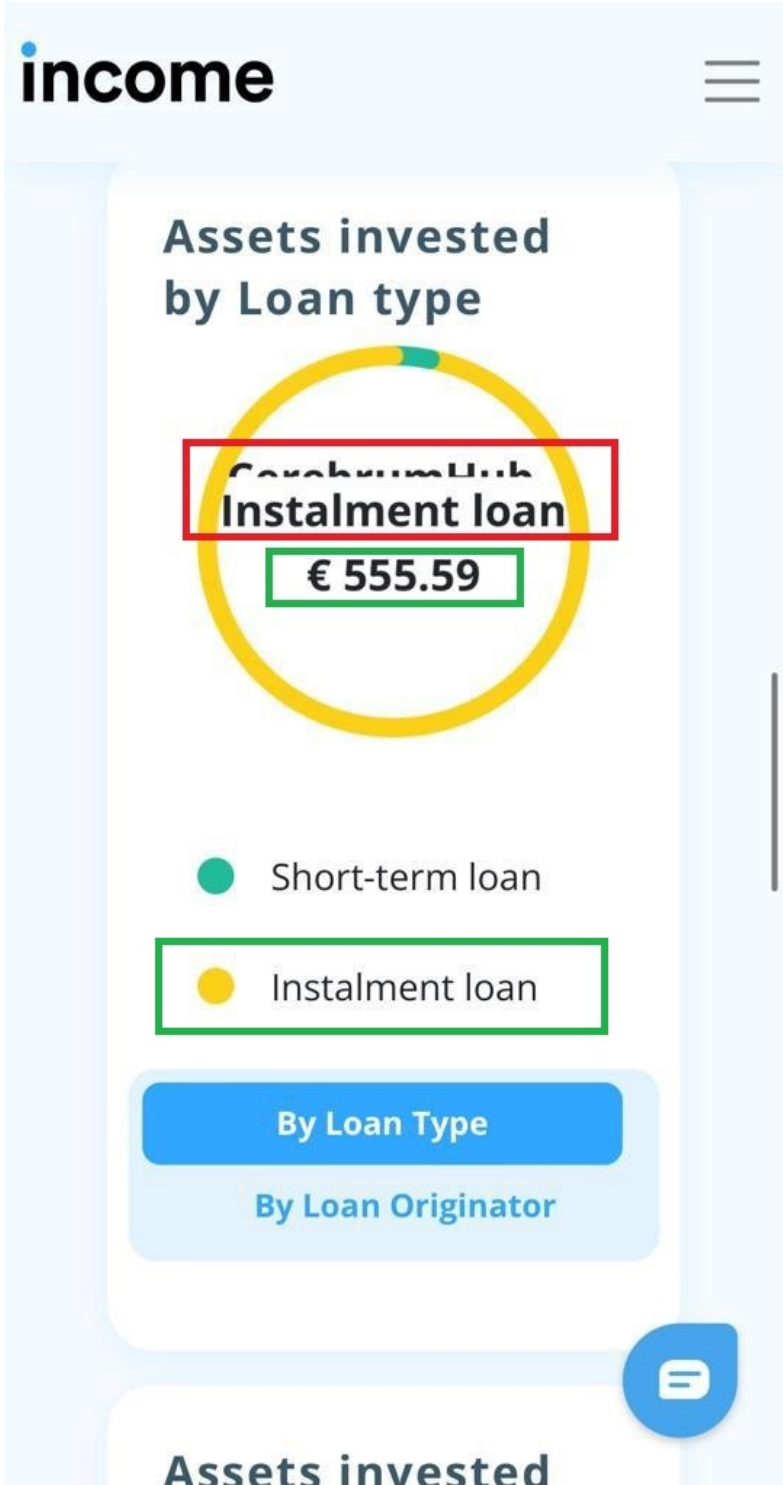

- Step 7 and Step 12: The user is presented with correct data that shows information from the right source and does not overlay with others.
- Step 8: The selected information title does not overlay the selected title from the previous tab.

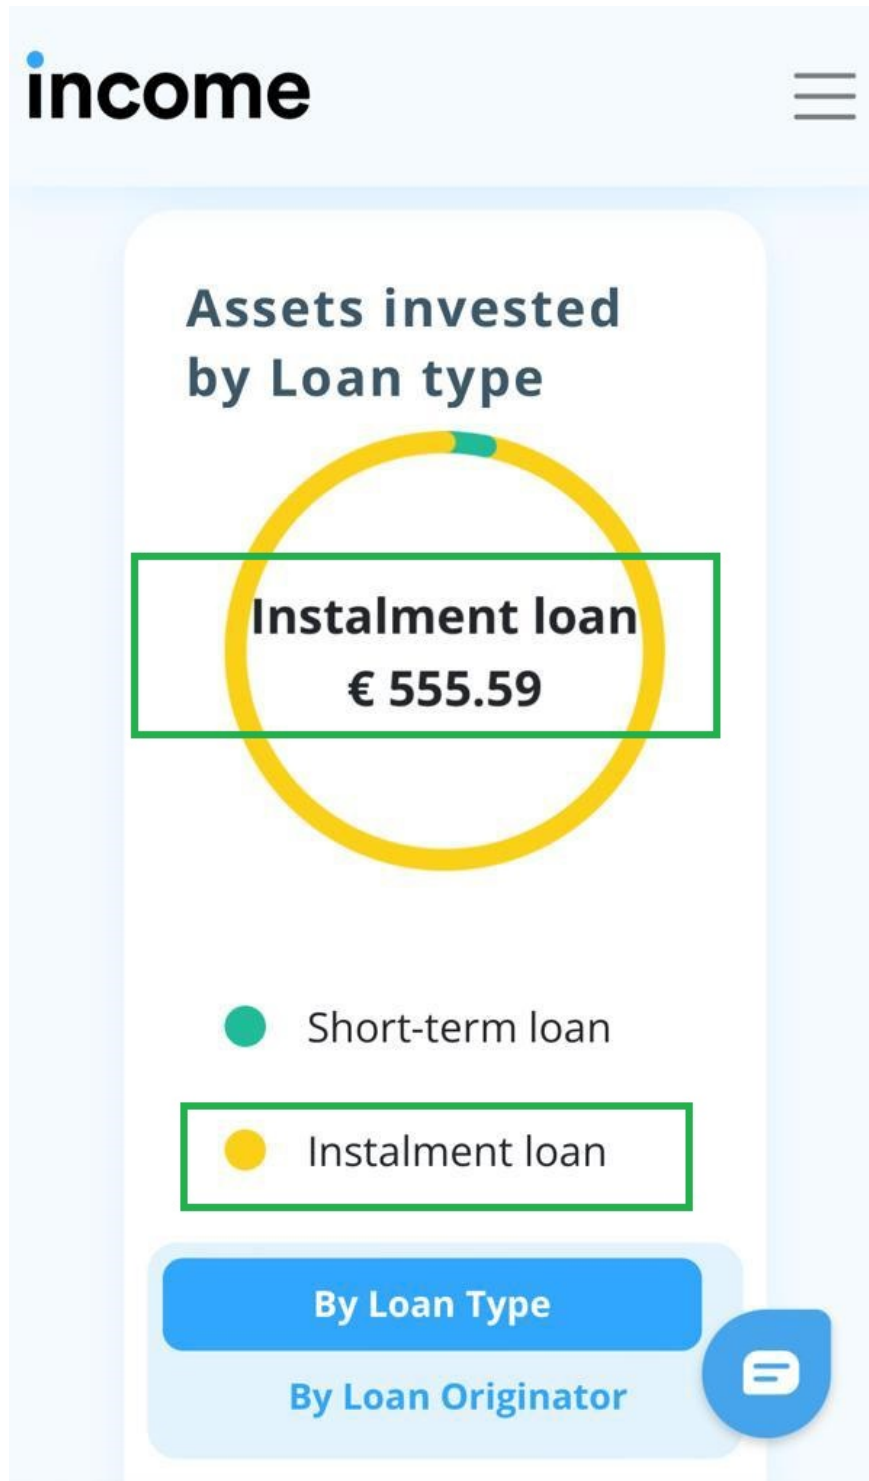

Actual result:

- Step 7: The user sees the title overlay from the Loan Originator and Loan Type, and the money amount from Loan Type

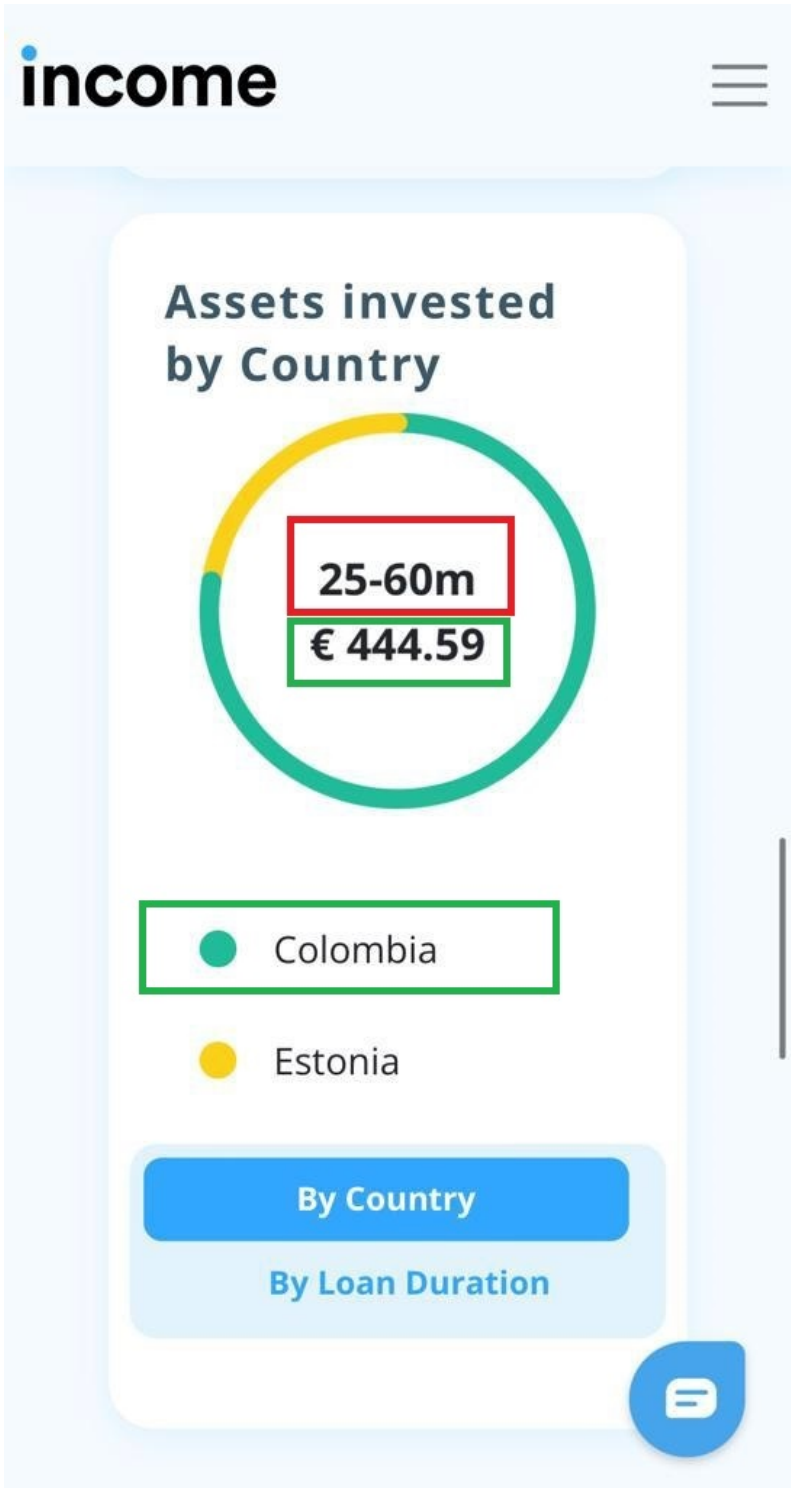

- Step 8: The user sees title overlays from Loan type and Loan originator with the correct money amount, and this overlay disappears after multiple tries to switch loan types presented.

- Step 12: The user sees the title from the Loan Duration and the money amount from the Country selected

- Sep 13: Presented Country and invested amount return to normal.
